### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 4-18-05 has been entered.

### ***Information Disclosure Statement***

The Information Disclosure Statement filed on 4-18-2005 has been considered. An initialed copy is attached hereto.

### ***Claim Rejections Maintained***

#### ***35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The new matter rejection of claims 1, 4-8 and 10-19 under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention is maintained for reasons of

Art Unit: 1645

record. Since Applicant has set forth no new arguments, the rejection is deemed proper and is maintained.

As outlined previously, claim 1 recites the limitation "said SRFs are not bactericidal proteins or peptides". As outlined previously, this phrase does not appear in the specification, or original claims as filed. Moreover, Applicant does not point out specific basis for this limitation in the application, and none is apparent. Therefore this limitation is new matter.

***New Grounds of Rejection***

***35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 13 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention is maintained for reasons of record. Since there are no new arguments set forth by Applicant, the rejection is deemed proper and is maintained.

Claim 1 recites the limitation "concentration of about 1000 to 50,000 AU of said stress response product/ml, corresponding to a reading at 254 nm in the UV range of light wherein the concentration of the stress response factors gives an Optical Density of 1.0 to 5.0.". This phrase does not appear in the specification, or original claims as filed. Moreover, Applicant does not

Art Unit: 1645

point out specific basis for this limitation in the application, and none is apparent. Nowhere in the specification is a correlation between product concentration and recited O.D. range.

Therefore this limitation is new matter.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 13 recites the limitation "stress response factors" in line 4. There is insufficient antecedent basis for this limitation in the claim.

### ***Conclusion***

No claim is allowed.
